

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings in the application:

**Listing of Claims:**

1. (Previously Presented) A display device, the surface of the device being rendered touch-sensitive, the device comprising:

a first dedicated part having two insulating plates,

a layer of material exhibiting electro-optical properties suitable for rendering all or part of its surface visible under the effect of an electrical control signal, the layer being disposed between the two plates,

at least one first electrode having the shape of a pictogram, the

at least one first electrode being disposed on a face of one of the insulating plates,

a second electrode disposed on a face of the other insulating plate opposite at least one first electrode,

wherein the second electrode is used as responsive element of the touch-sensitive surface of the device, in that the surface area of the second electrode is at least  $9\text{ mm}^2$ ,

and in that the surface area of the second electrode is greater than or equal to the surface area or the sum of the surface areas of the first electrode or electrodes opposite.

2. (Previously Presented) The device as claimed in claim 1, wherein the first electrode is fed electrically by a pad in that the second electrode is profiled opposite the pad.

3. (Previously Presented) The device as claimed in claim 1, wherein it comprises several second electrodes, and in that each second electrode is fed separately.

4. (Previously Presented) The device as claimed in claim 1, wherein the pattern of the second electrode covers substantially a circle of at least 9 mm in diameter.

5. (Previously Presented) The device as claimed in claim 1, wherein it comprises a second non-dedicated part.

6. (Previously Presented) The device as claimed in claim 5, wherein the second non-dedicated part is arranged in the form of a matrix with row-wise and column-wise addressing.

7. (Previously Presented) The device as claimed in claim 2, wherein it comprises several second electrodes, and in that each second electrode is fed separately.

8. (Previously Presented) The device as claimed in claim 2, wherein the pattern of the second electrode covers substantially a circle of at least 9 mm in diameter.

9. (Previously Presented) The device as claimed in claim 3, wherein the pattern of the second electrode covers substantially a circle of at least 9 mm in diameter.

10. (Previously Presented) The device as claimed in claim 2, wherein it comprises a second non-dedicated part.

11. (Previously Presented) The device as claimed in claim 3, wherein it comprises a second non-dedicated part.

12. (Previously Presented) The device as claimed in claim 4, wherein it comprises a second non-dedicated part.
